Investment Philosophy

The Ave Maria Focused Fund will invest primarily in equity securities that the Adviser believes have high earnings growth potential. The portfolio will be invested in companies believed to offer products or services or engage in practices that are not contrary to core values and teachings of the Roman Catholic Church.

Moral Screens

Our moral screens eliminate companies engaged in:

ABORTION

PORNOGRAPHY

EMBRYONIC
STEM CELL RESEARCH

POLICIES UNDERMINING THE
SACRAMENT OF MARRIAGE

Buy Discipline

Adviser favors companies with:

- Favorable stock price in relation to free cash flow, earnings, dividends, book value and asset value
- Global, world-class operations with strong historical and prospective growth potential
- Catalysts including changes in operations, management, capital allocation, strategies or product offerings, which have a favorable impact on shareholder value

Sell Discipline

Stocks are sold when:

- Price exceeds our estimate of intrinsic value
- Company fails to achieve expected financial results
- Economic factors or competitive developments adversely impair the company's value
- Company becomes a violator of any moral screen established by the Catholic Advisory Board

² Fund holdings are for illustrative purposes, subject to change and should not be considered a recommendation to buy or sell securities. Current and future portfolio holdings are subject to risk.

The Adviser invests only in securities that meet the Fund's investment and religious requirements. The returns may be lower or higher than if decisions were based solely on investment considerations. The method of security selection may or may not be successful and the Fund may underperform or outperform the stock market as a whole. All mutual funds are subject to market risk, including possible loss of principal. The Fund's investments in small- and mid-capitalization companies could experience greater volatility than investments in large-capitalization companies. AVEAX is classified as non-diversified and may therefore invest a greater percentage of its assets in the securities of a limited number of issuers than a fund that is diversified. At times, the Fund may overweight a position in a particular issuer or emphasize investment in a limited number of issuers, industries or sectors, which may cause its share price to be more susceptible to any economic, business, political or regulatory occurrence affecting an issuer than a fund that is more widely diversified. The issuers that the Fund may emphasize will vary from time to time.

The investment performance assumes reinvestment of dividends and capital gains distributions. Performance data reflects certain fee waivers and reimbursements. Without such waivers, performance would have been lower. The S&P 500[®] Index is a capitalization weighted unmanaged index of 500 widely traded stocks, created by Standard & Poor's. The index is considered to represent the performance of the stock market in general. Indexes do not incur fees and it is not possible to invest directly in an index.
